

Lynn: [00:02](#) Hello. I'm Paul and this is my beautiful wife Lynne. And today we are joined by a couple of other people who have some questions. About plasma energy. And. Guide. So I'll let Lynne give a short introduction here.

Lynn: [00:26](#) Well we're going to start talking about Shungite because what I did was just gave a phone magnet to each each of our couple here and they want to know are the Russians aware of the torsion field activity and that's where Paul got a lot of this information. And that's what prompted him to do the Russian pyramid. So I'll let you take that over and talk about the Russian research.

Dr. Paul: [00:58](#) Which direction do you want to go with this?

Lynn: [01:01](#) Well we're we're going to talk just a little bit about the Torsion Fields and then why you're using the pyramid. And and how the Torsion Fields are affecting the E.M.F.s And the harmful fields that we're around.

Dr. Paul: [01:19](#) OK. That cell phone magnet you stick right on your cell phone changes the rotation of the Torsion Fields that come off of the phone. Now the. Electromagnetic Fields put out by the phone that are harmful to our bodies are left hand rotation. I'm sorry it is the left hand rotation means it rotates this way. When you put the shungite with the. Silver Gans water and the magnet on the phone it changes the rotation of the plasmatic field to the right which is non harmful or in some cases even beneficial to the human body. And that's the same thing that happens with this. Russian pyramid. It generates a torsion field that rotates to the right from the bottom up. And. Causes is in the pyramid to have the proper rotation on it.

Lynn: [02:59](#) And then in here. You have some of the shungite rocks. And you have those in a certain format.

Dr. Paul: [03:13](#) Those are in three clumps of three each In a triangle at the base and taking advantage of the sacred geometry of the three, six, nine numbers. To help bolster the rotation of the Torsion Fields in the proper manner to energize the products that are inside of the pyramid.

New Speaker: [03:47](#) So then I was also telling him about the. Fact The Beekeeper down in Florida and how the Torsion Fields. Paul sent a lot of the Shungite powder with other things in it as well as the magnets. So Bob could attend to his beehives because he lost 10000 bee hive to beetles. And. He also got the new tech

frequency relief vial which he then made his main jar of new tech frequency relief. And then he took some of that and sprayed. All of the beehives. As well as the bee hives that had been destroyed. By the beetles. And then tell him what happened when he went back a week later.

- Dr. Paul: [04:43](#) With the beetles. When he checked on them a week later. All of the Beatles were dead and the bees were starting to come back and were more active. The bee hive finally regenerated. He repopulated that bee hive and it regenerated and. Started producing more and more honey. So it went from being. Almost completely dead. Back to being a viable honey producing hive with healthy bees. All due to the Shungite powder.
- New Speaker: [05:29](#) And then you've also made a big magnet for breaker boxes.
- Dr. Paul: [05:37](#) And those those large magnets are similar to the ones we put on the phone only they about four and a half inches. In diameter and they change the rotation. Of the. Electromagnetic Torsion Fields that are coming off of your electrical panel which emit harmful electromagnetic fields into your house.
- Lynn: [06:08](#) So he said when I put this on my phone. Changing the frequency is what it does.
- Dr. Paul: [06:16](#) No it doesn't change the frequency it changes. The the electromagnetic field. The frequency is the same but the rotation of the field is different. Instead of being a left hand rotation it's a right hand rotation instead of going this way. It goes this way. And so that that is compatible with. The human or animal body whereas the other rotation is not. Which is much like the change in music from. Even harmonics to odd harmonics because it agitates our Bodies in some way. Right. And that was done. By. Intention. I think.
- guest: [07:11](#) You touched upon something. What's not. Detrimental to good. Things in one area such as these is detrimental to the predators or the hunters become the hunted. And so the beetles pass and the bees flourish. And I think the president was alluding to the chem trails in the same manner. What. Is being laced into the atmosphere s detrimental to us but not to those who are Invoking or promoting it. And so when those trails are changed or the perpetrators are removed from the equation and healing things are dispersed into the atmosphere that are good for us and heal the damage. From the initial. Bad components that were sprayed into the atmosphere. It's good for us if the healing is good for us. But it's bad for those who are the perpetrators. Which I liken that to the bees and the beetles scenario.

Lynn: [08:21](#) I guess life is full of bees and beetles so let's figure out which one you want to be. And you know what. You mentioned something about the Lyme.

guest: [08:36](#) For a Lyme disease. Yeah. Yes. Yes yes. A friend of mine my girlfriend's daughter she got bitten by a tick. And I guess the doctor was saying there was a rocky mountain fever and she was just vomiting and diarrhea and high fever. Yeah of course doctor wanted to put antibiotics but when I saw your research and all the symptoms there was written and I'd been drinking their plasma energy water for five or six months and I absolutely love it. So I thought you know when I saw that program I was so excited. And why not introduce that to a child and she could just drink their water and have that in their system all the time instead of going for antibiotic and wishing that's going to work and if that ever flared again then she has it right there with her. So for prevention as well I wanted to obtain that. And give it to all the children that I know. Because they are such an active children you know. So in Montana they're out there hiking. Sure the river's edge and all of those things where you're going to get bit by something and this Rocky Mountain spotted fever is no joke. So it works for the Lyme she was hoping that it could either work for the Rocky Mountain or be tweaked to work for the Rocky Mountain.

guest: [10:16](#) But you know when I saw all the ingredients that you put it in there it's not just for Lyme disease it could be for M.S. Could be for other disease that that has similar symptoms. And with all the supplements. Why not. You know I would think that would all work it couldn't hurt. Instead of taking all the medications natural way of harnessing the energy from the water.

New Speaker: [10:47](#) Well the way we got to the ingredients is a woman back east who'd have Lyme disease and chose not to go on a. Medicated route with it and chose alternatives. She wanted to have the energy of all those ingredients available because they're expensive. For one thing. And and what if the supply line was interrupted and you couldn't get what you needed for another. So I told her do the research on it and send us what you want to have done. We've done this in several cases now with other formulas. If you send us everything you want in there what we will do is make the formula and then. We will send you half of what we make half of the gans. And we will keep half and we'll make that half available to anybody who might be interested in it. So that's how the Lyme formula came about. Well she wrote me and said I must be your first guinea pig because I was bitten and I had all the symptoms again and she said I was really pleased that it only took several days using the water. To get rid

of the symptoms. So and and what's showing up now is that Lyme disease is not only carried by ticks. It is now has a little bit of a designer approach to it so it can now be carried by other flying insects. And there was one piece of research which may have been in the information I put out. That. It may have been. Developed during Little World War 2. as something to be used in the in the bio arena. So.

guest: [12:52](#) Tell. Me What is the. Normal. Regimen of treatment with antibiotics for Lyme disease?

Dr. Paul: [13:02](#) It Is 18 days on antibiotics. And then a two or three day break and then another 18 day regimen of treatment. And then when you stop using it. The. Ricketsea or the flagalates or Spirokeats or whatever you want to call those little organisms that are the Lyme disease. Come out of hiding. Because the antibiotics make them curl up. And hide within the red blood cells. But then when you quit using the antibiotics they uncoil and come out of hiding break open the red blood cells and re infect you again. So they protect themselves from the antibiotics by hiding in red blood cells. And when the antibiotics are gone here they come again. Now. Obviously this does not happen with the. Herbal remedies. The effects take place within four or five days and are long lasting. They don't show up the symptoms don't show up again unless you become re infected or re bitten by another. Tick or mosquito or lice. They even say lice, chiggers and other biting insects carry Lyme disease now. So there is a lot of things that we aren't really told about that are going on.

guest: [15:13](#) Well it occurs like malaria. It's interesting that you address that because the family that hikes with the little girl was bitten. They have a bunch of small children too and they go back to Michigan. Where they're originally from here in Montana. Now. The father was bitten years ago. And it's like malaria comes back. He has flare ups. So if they're on the Gans. all the time I would think that would be a preventative you're already saturated. You get bit and the fights on right and the Lyme is going to lose.

New Speaker: [15:54](#) I like to think that it sets up our bodies in a way that when something comes to bite us in fact ate at lunch today there was a mosquito that kept buzzing around my hand. And it landed a couple times but it never did bite. And. I think if it had it probably would have been going., wrong flavor .

guest: [16:18](#) And I have used this plasma energy water in a spray bottle. And when I go do my exercise. Sometimes there's the. mosquitoes and I just spray it and whoever is around me I'll just spray them.

They don't know what I'm spraying but they're hot so they enjoy it and I and I nobody complain about mosquitoes biting and I just don't say anything but I know it works.

guest 2: [16:46](#)

So she goes into the mountains.

guest: [16:48](#)

Yes. I mean they're like air squadron sites spread all over me my clothes. And I remember you said you know the wouldn't have been spreading around my house and I notice this. Just let it less than a month and all that. I'm not getting insects and I have a lot of old wool garments. So I've been doing it around my door and inside the house and it's not that noticeable so I know they definitely do not like that. And then and it's really nice and I want to go back to this Shungite.. So. For this size I would use it on my phone.

Dr. Paul: [17:32](#)

Yes.

guest: [17:32](#)

So what about this is the size for the phone. OK so what about the computer when you open the computer.

Dr. Paul: [17:40](#)

Yeah the same same thing. Use one of those just like that's on your computer.

guest: [17:46](#)

OK. So I could wear it as a pendant as I tell you about.

Dr. Paul: [17:51](#)

Yes ma'am. I have one here.

Lynn: [17:53](#)

OK good. Only mine's got some Amazonite stones in. I have a little tablet over here and we use the same size on it. But anything that's wireless that it makes sense to put on I have it on anything like the printers.

guest: [18:19](#)

Oh I got to just put it on our printers. I put it on the monitors baby monitor TV set.

guest: [18:26](#)

Yes because a lot of mothers put their baby monitors right by their head because right here when they wake up or making certain noises.

Dr. Paul: [18:35](#)

There's electromagnetic fields coming off those baby monitor directly go right into the baby. So they should have one of those on there. You bet.

guest 2: [18:47](#)

Absolutely. As we spoke off camera that the. Weaponized microwaves that are released into the phones and into the fireman's communications. Military communications frontal

lobe tumors in under 18 months in young men that are in the peak of their health and conditioning for their job description. They're developing frontal lobe tumors within 18 months from the Tetra system in the UK military systems here. The crowd disbursement systems where they have a Humvee pulling a big microwave unit that makes it so the crowd can't stay there; they are dispersed with microwaves and more. All of those things on another civilian scale are these phones and all the devices you just mentioned all. And the phones work perfect if the other frequencies are not there. So they are being added a potpourri of deadly frequencies to harm small children to harm everyone. And that's what the president's also speaking about. These systems will work fine without having all of this deadly mix right. But in the interim. everyone needs to protect ourselves and our children.
