

## **Special Report Includes the Following:**

- **Notes From Frontline Doctor's Report On EXPERIMENTAL BIOLOGICALS Known As VACCINES**
- **Gene Therapy Or Vaccine? By David E. Martin**
- **Legend Hank Aaron Dies by Mike Adams Natural News**
- **The Corporate Take Over of America by Bards FM**

0123-2020-Notes from the following video:

<https://rumble.com/vcqw73-dr-simone-gold-on-covid-hydroxychloroquine-and-the-vaccine.html>

[www.AFLDS.com](http://www.AFLDS.com)

Go to website for teledoctor appointment for hydroxychloroquine.

People are filled with fear and weary and now rushing headlong to the vaccine with irrational decisions:

- F a u c i says the vaccine doesn't stop transmission; you will have to keep wearing mask and social distancing
- C O V19 Facts:
  1. 99.997% survival under age 20
  2. 99.98% for age 20 to 49
  3. 99.5 survival age 50 to 69
  4. 95% over age 70 with no treatment
  5. Early treatment it is recoverable
  6. People who died were destined to die anyway. Dr. Gold's doctor dad said, "pneumonia is an old man's best friend"; a cold, pneumonia, nose bleed... anything can take you out if you are frail
- Lancet published unsafe hydroxy study...90,000 patients over 5 continents in a study? The Lancet withdrew the study...it was complete fraud but hydroxy studies were halted and it was 'trashed.'
- The media was lying...they buried the story of the Lancet retraction.

### **Problems with experimental, biological agent:**

- MRNA is new technology and has not been tested

- Failure of previous corona virus vaccines: 2002 SARS C O V 1, the one now is SARS C O V 2...cannot do this safely in humans
- No independently published animal studies; did animals die in the study:
  1. Anti-body dependent enhancement, pathogenic priming, immunity enhancement—well known to scientists and big problem has been seen with prior C O V vaccine. Ferrets died after 2 doses and then exposed to SARS C O V 1 in the wild.
  2. Neurologic complications such as Bell’s palsy, neurologic problems, Transverse myelitis.
  3. Potential fertility problems with this biological agent—it affects a layer on the placenta; MRA vaccines mimic having C O V indefinitely. Survival in younger women of child-bearing age is 99.9%.
  4. Pfizer executives in Europe said it was danger to release this.
  5. Pharmaceutical companies are immune from ALL liability.
  6. The vaccine does not stop transmission: surgeon general said in a Good Morning America interview in January, 2021.
  7. People take the vaccine and now test positive for the C O V 19; are the numbers being ‘gamed’ and the cases have risen? Will they say that the cases have risen because these people test positive?
  8. There is no proof that this reduces mortality.
  9. We don’t know how long this lasts; will you have to take this yearly?
  10. This is experimental...that is the proper name for it.
  11. Is it worth the risk when the vaccine is given to otherwise healthy people and they are then exposed to the virus in the wild like the ferrets? What happens to military and health care providers, first responders and front- line people? This is risky from a national security perspective.

**African Americans and others of the black and brown minorities have a natural antipathy towards vaccines. Government is making overt and covert attempts to push this on these minorities. Examples of vaccines gone wrong as documented in the scientific literature:**

- Race and ethnicity with the rubella vaccine were affected at a higher level than Caucasians
- Measles produced the same experience as did Pertussis
- Hamato’s (?sp) Influenza produced the same experience
- Hepatitis vaccine given to babies produced the same different response—white boys were 60% less likely to have autism diagnosis relative to non-white boys
- US Government language: *the CDC is telling the public at large that getting an experimental vaccine is a good thing. It is additionally telling black people that getting*

*the vaccine is ‘racial justice’ and an ‘advantage.’ This is from thecenterofhealthysecurity.org interim framework for C O V 19 Vaccine allocation and distribution in the US. Getting the vaccine early is racial justice.*

- There could be racial differences in dosage as seen in the aforementioned vaccines, but how is it racial justice to sign up first for an experimental, biological agent? They add: ***the ultimate safety of a vaccine is not knowable until it is administered to millions of people; it is possible that certain adverse effects may occur more frequently in certain population subgroups which may not be apparent until millions are vaccinated...pharmical vigilance track and trace systems will provide critical information that will inform adjustments to the allocation.*** This is in the same document as “let’s give it to black folks first.”
- Front line Doctors say *the most disenfranchised members of society are to be vaccinated first and their words (government) include racial and ethnic minorities, tribal, incarcerated, rural, disabilities, underinsured, people who work in school settings and nurses, and we must prioritize Blacks and Latinos to reflect fairness and justice.*

We know the people who fall to C O V 19, the 2.6% are nursing home patients and people with co-morbidities, people over the age of 75. We know the risk is the 80 year old living in the nursing home with bad heart, bad lungs, diabetes, obesity and more.

**Policy from HHS.gov: *strategies for distributing CoV19 vaccinations: focus on targeting key populations and communities to insure maximum vaccine acceptance.* This is along with quotes from the Bill and Melinda Gates Foundation about how to manipulate the media and silent opposition to it.**

When you are in a pharmical vigilance track and trace system by taking the vaccine, it means you have enrolled yourself in a medical trial. Very few people generally do this and people are not aware they will be tracked for 2 years in a program started by the Department of Defense, handed off to Oracle and Google, to put the data together. Why would you want to do this and how is this fair racial justice?

As an ER doctor Dr. Gold did not see any racial issues or difference. It is true that there are areas where Black people were disproportionately affected as in New Orleans where Blacks were 31% of the population but Blacks were 70% of the people who went to the hospital with C O V 19. Look at the data, race is not a factor as much as diabetes and obesity and other serious medical problems as risk factors, plus living and working in crowded areas.

This has been all over the world with all races. In areas of the world where people have the high individual and group risk factors as mentioned above, it is not Black people that get C O V

19 but those people in those situations. In the UK it was Middle Eastern and Asians with those risk factors. Africa has been spared except for South Africa. In America the death rates are 800 range per million, in India they are around 70 per million because of their liberal hydroxychloroquine policy, sub-Saharan Africa -the poorest places in the world- with no social distancing, no masks and no ICUs, the death rate is 1% of the western nations.

You have the CDC, NIH and FDA not helping you.

## **The America's Front Line Doctors have the following recommendations:**

- **If you are under age 20 the experimental vaccine is prohibited;** we don't know the effects on fertility and we do know this virus essentially does not affect young people.
- **From the ages 20 to 50 if you are healthy, we strongly discourage** this vaccine because of the exceedingly low risk of death from C O V id, unknown risks from the experimental vaccine causing auto-immune disease, unknown risk of the pathogenic priming antibody dependent enhancement, and unknown risk of life-long infertility.
- **From age 50 to 70 if you are healthy, we strongly discourage** for the same risks mentioned above in the 20 to 50 group.
- **From age 50 to 70 and you do have serious comorbid conditions we say that it is discouraged** because the vaccine is higher risk than early or prophylactic treatment with long-established medication such as hydroxychloroquine or ivermectin.
- **From age 70 and above if you are healthy it is your own personal risk assessment.** We believe an experimental vaccine is less ideal than old established medicine but we say to leave it up to the person.
- **Over age 70 with serious comorbid conditions such as nursing homes we also call it your own personal risk assessment.** We stand with prophylactic treatment with long-established medication such as hydroxychloroquine or ivermectin for that population. We are not saying it is irrational to take it in the over age 70 group described. We do say that any age should not be pressured especially if you are over 70 with no advocates. We are not saying it is unsafe, we are saying we don't know if it is safe.
- **I would never give this vaccine to a woman of child-bearing age.**

## **Call to action from America's Front Line Doctors to fight the urge that is sweeping the globe to mandate people taking an experimental biological agent.**

We are concerned about private businesses mandating this such as employers, businesses, and travel—the airlines in particular. You can imagine if all the CEOs of the airlines got together and said they were going to mandate the vaccine, it's like the masks. You cannot avoid their

mandates and that is a very big problem. We will talk to these businesses and go in armed with at least one million human beings who are going to say, *No, we are not going to do business with anybody and we are not going to comply with anybody who is going to mandate this.*

If you want to take this vaccine or have your mother take it, that is your choice. We don't need the CEOs of any companies forcing the experimental biological agents on anyone. We are at their mercy if we don't get ahead of them before they make bad decisions. Go to [www.stopmedicaldiscrimination.org](http://www.stopmedicaldiscrimination.org) and sign and share the petition with everyone. This is your life. How can you travel or advocate if you cannot get on a plane?

If you are a part of a union bring this to the union as a human rights issue. The union has not heard the facts. The pilots, teachers and nurses all have unions. This is a human rights issue that we cannot mandate that human beings take experimental agents. Always use the words experimental agents when you talk about this...ALWAYS!

Socialists win the language war and they change language. First this was the Wuhan Virus, then it became the 'corona virus', then it became C O V 19 and this is a battle for words. The word to remember is EXPERIMENTAL.

You can find all this on our website and there are 35 pages of information and references.

## Gene Therapy Or Vaccine? David E. Martin

<https://www.bitchute.com/video/AuvhMTMoby41/>

Moderna Pfizer = Gene therapy not vaccine...a synopsis

**15US code section 41: Federal Trade Commission Act on deceptive labeling and deceptive medical practices.** If this law can be applied to shut down natural practices, then it can be used to shut down deceptive labeling medical practices.

There are people for whom medical vaccines are a requirement for employment. Something has troubled me: both Pfizer and Moderna are promoting what they call a vaccine. Is whatever you get going to keep you from being infected by some sort of pathogen and the other assumption is are you doing your public health bit to make sure you don't transmit to other people?

**1905: Jacobsen case, Massachusetts: supreme court** – *this court has more than once recognized as a fundamental principle that persons and property are subject to all kinds of restraints and burdens in order to secure the general comfort, health and prosperity of a state.* This says that public health powers were legitimate if they secured the general comfort, health and prosperity of the state which implies that the individual benefit is superceded by the collective benefit. Somehow or another the individual is not the point in public health laws. It suggests that to meet a public health vaccine standard and definition something about either you are immune from getting a pathogen or you are not going to transmit the pathogen must be part of what lives inside that definition. It couldn't be more straight forward.

## **When you look at the SEC filings for Moderna they make a point of saying that their technology is a gene therapy technology.**

*They don't say vaccination.* It was set up to be a cancer treatment so this is gene therapy chemo therapy. Would you take chemo therapy for a disease that you may or may not ever have? Is that a dumb idea? States and employers could not mandate chemo therapy for a disease that you do not have. That is not a legal thing to do. This is not investigation of new drugs. References can be found in the youtube video.

**Moderna is putting a synthetic fragment of nucleic acid and it is not RNA, it is not natural and not a natural component of a fragment. It is a synthetic technology embedded within a fat carrier and that is introduced in the cell, not to induce immunity to an infection to a SARS C O V virus and it is not to block transmission of it, but to lessen symptoms associated with the S-1 spike protein and not even the virus itself.**

This gets better (or worse). The fact of the matter is this thing is not a vaccination. Let's look at the legal standard of what a vaccination is and start with the CDC's own definition: *two important operative definitions-immunity is protection from an infectious disease. If you are immune to a disease you can be exposed to it without becoming infected.* By definition neither Pfizer or Moderna even claims that to be the case. In their clinical trials they specifically say they are not going to test for immunity.

CDC says that a vaccine *is a product that stimulates a person's immune system to produce immunity to a specific disease and protecting the person from that disease. Vaccines are administered through needle injections but can also be sprayed into the mouth or the nose.* What Pfizer and Moderna are doing do not match this definition.

## **If this isn't a vaccine why are they calling it a vaccine?**

CDC is not the law but an expression of an agency empowered by the law. Laws where vaccines have been defined—vaccine is not defined in a number of statutes. Iowa code: *vaccine means a specially prepared antigen administered to a person for the purpose of providing*

*immunity.* Washington State Code: vaccine means *a preparation of a killed or attenuated micro-organism or fraction thereof ...* mRNA that is synthetically developed by Moderna and Pfizer do not meet this definition of statutes.

## **The primary endpoint of the trials of Moderna and Pfizer is the prevention of symptomatic C O V 19 disease.**

Starting with this you know that in February the WHO, CDC and Dept of Human Services made a very clear distinction to make sure that C O V 19 *which is a series of clinical symptoms including fever, muscle pain, aches, loss of smell, and certain radiologic findings in the lungs.*

Now all this has been re-defined as **P I C** which is **pneumonia, influenza, C O V I D** as a combined set of things so they can ‘catch’ more people dying of this.

## **C O V I D 19 is not a disease...it is a set of symptoms.**

They were very clear and they tried to say that SARS C O V 2 caused C O V 19. But the problem was that most people who tested positive using the RTPCR method had no clinical presentation so you cannot say that the virus causes the disease. Most people with the positive PCR test which for a fragment of what was called SARS C O V 2 did not have any problem ...over 80% had no problems. The primary end point for the vaccine trial was not a vaccine end point which has to do with immunity and transmissibility and neither of those were measured.

## **It gets worse. This is from Moderna’s own statements: *key secondary points include prevention of severe C O V 19 disease and prevention of infection by SARS C O V 2.***

Here is a problem by their own admission of their studies that it was *impractical to measure infection.* There is no evidence in the Phase 3 clinical trials that any of the gene therapy had anything to do with the infection or not of SARS C O V 2. You cannot have a vaccination that is not under the legal definition of vaccination and does not meet immune or transmission standards. The clinical trials were set up specifically so that neither immune nor transmission standards could be met.

## **Quote from New England Journal of Medicine and The Lancet: *October and December, 2020 respectively—at the time of this writing no correlative protection from SARS C O V 2 has been established.***

In other words not a shred of evidence from the clinical trials said anything about protection from infection with SARS C O V 2. So every person who has ‘value-signaled’ their

vaccination because they are doing their part not to be infected with SARS C O V 2 and not to get C O V 19—YOU HAVE BEEN VIOLATING THE FEDERAL TRADE COMMISSION ACT BY DECEPTIVE PRACTICES. YOU HAVE TOLD PEOPLE THAT THERE IS A PROTECTION THAT THE DATA ITSELF DOES NOT AFFORD.

**Here is a second report from New England Journal of Medicine and The Lancet: *No existing vaccines have been shown to be effective against infection with ANY Beta-Coronavirus—the family that includes SARS C O V 2 which causes C O V I D 19.***

This begs the question: what would motivate Pfizer, Moderna, Fauci, and CDC and others to lie to the American people about this being a vaccine? Vaccines in the ordinary course in the use of the term invoke the protection against infection and protection against transmission, neither of which have been established at all. Why use the term vaccine?

Now we have to go to conjecture: as recently as 2018 Moderna was insisting they were not making vaccines and this was gene therapy technology. Suddenly it became a vaccine company. It's a gene therapy technology company with an unproven gene therapy. That is what it is.

**Here's the reason, in my opinion, that we are hearing about vaccines:**

if Fauci, Moderna, authorities, companies around the world called this gene therapy chemotherapy *people wouldn't want to take it* and for a good reason. Experimental gene therapy is a bad idea no matter who, what, where, when it is and should not be recklessly and relentlessly introduced to a population.

*Secondly there is the 1986 liability exclusion.*

This is what it really is—as long as Secy of Health and Human Services keeps the state of emergency going along with every mayor, governor and unelected official under the emergency use authorization rules, liability is a shield afforded to Pfizer, Moderna and others like them. They are making billions of dollars on the back of something for which they have no liability. ***But, if this was not a vaccine, then all of a sudden, the liability shield would vanish.*** There is not a liability shield under the 1986 act for medical counter-measure that is gene therapy. This means we are probably having governors, CDC, Health and Human Services and others maintaining a state of emergency not because of a state of emergency but because it maintains the illusion of the liability shield.

**Remember, if you suspended the state of emergency today as the governor of a state, lift it and on the day that you do that, the RTPCR cannot be used because it is not a diagnostic. It has never been approved and it cannot and does not diagnose and prevent a disease.**

That means that every time Blumberg, Gates Foundation, Zuckerberg Foundation, C O V 19 dashboard reports that there is another case of C O V 19 *because of a positive RTPCR test*, they are violating the 15 USC code Federal Trade Commission Act. You cannot diagnose a thing that cannot diagnose a thing. That is a misrepresentation. That is a deceptive practice under the Federal Trade Commission Act. They are liable for deceptive practices. You don't have a waiver of liability under deceptive practices even in a state of emergency. Maybe the reason they call it a vaccine is because they count on the fact that neither you nor I will ever have this video, that you and I will never do independent inquiry and that you and I will never ask the question of *is it possible that what Operation Warp Speed was nothing but propaganda?*

**This leads me to my conclusion: some of you know this and some of you don't. Operation Warp Speed has a middleman which is a company called ATI which is a defense contractor out of North Carolina and it turns out that they are the one that clears the billions of dollars for orders of vaccine.**

That defense contractor is the one that is supposed to control the rollout of the vaccine which has been a train wreck even beyond the moral, ethical and legal obligations that we have just talked about. ATI also has another contract with the Department of Defense and other government agencies. That contract is for propaganda and misinformation. So the company that actually got the contract to officially manipulate public media to officially convey the propaganda of the US government—that company is also the company in charge of Operation Warp Speed.

This thing stinks like rotten fish because it is rotten fish. You are being lied to and your own government is violating its own laws—15 USC is not my interpretation. **They have thrown the book and shut down practitioners around the country time and again for violating what are called deceptive practices and medical claims. Guess what? They are doing that exact thing.**

Send this to your US Attorney and your AG in your state. Do something with this video. This is a violation of federal statutes by defense contractors, gene therapy companies that are not vaccine manufacturers who are doing experimental trials under deceptive medical practices. That is what this is. By the way, every statement I have made before I went to my opinion *and my opinion is pretty grounded because if you really examine why I think the liability shield is the point*, look at how many times the Department of Defense wanted to confirm that they were shielded under the Immunity Act of the Emergency Use Authorization. **They would not play this game if they did not get the liability shield and that liability shield came from the Emergency Use Authorization.**

We are very desperately in need right now as a civilization because real people are being harmed and having significant side effects and some people may be dying. A healthy doctor in Florida got the vaccine and in a couple of days started having splotches and blotches and died after two weeks. His death is being investigated by Pfizer and the CDC. That is like asking a bank robber to investigate their own bank heist. This is beyond insane and it's time for each one of you to send this to law enforcement in your state. Someone out there in these 50 states might actually care about following the law or this is not America. Do something with this—I am doing the work, you can help me carry the burden.

---

From: ([Natural News](#)) [www.naturalnews.com](http://www.naturalnews.com)

On Jan. 5, 2021 Major League Baseball (MLB) legend and Hall of Famer Henry Louis “Hank” Aaron publicly took a Wuhan coronavirus (COVID-19) vaccine during a stunt aimed at persuading more African-Americans to get injected. A little more than two weeks later, Aaron [died right on cue](#). (<https://noqreport.com/2021/01/22/mlb-legend-hank-aaron-dies-two-weeks-after-getting-covid-19-vaccine/>)

The reason this writer says “on cue” is because there is now a clear and undeniable pattern of elderly people – Aaron was 86 years old when he died – passing away roughly two weeks after getting injected with Chinese poison.

Aaron was among the first major figures to be injected as part of the [Donald Trump-launched “Operation Warp Speed” program](#) for fast-tracked mass vaccination against the WuFlu. Aaron had previously told the media that he was excited about getting jabbed. (<https://www.naturalnews.com/2020-05-15-trump-names-former-gsk-executive-head-operation-warp-speed.html>)

“It makes me feel wonderful,” Aaron told the *Associated Press* (AP) right before getting poisoned with a Chinese needle. “I don’t have any qualms about it at all ... I feel quite proud of myself for doing something like this ... It’s just a small thing that can help zillions of people in this country.”

The Atlanta Braves legend and one-time home run king’s official cause of death has not yet been reported by the mainstream media, which is presumably working overtime to scrub from existence all evidence that the guy was recently injected with [gene editing messenger RNA \(mRNA\) chemicals](#) at warp speed. (<https://science.news/2020-05-25-mrna-vaccines-how-they-work-coronavirus.html>)

**If you choose to get vaccinated for coronavirus, you’re asking to die**

While wearing his face mask incorrectly on camera, Aaron [wanted his injection broadcasted to the world](#) in order to encourage more folks, especially black folks, to get vaccinated. (<https://www.tnz.com/2021/01/05/hank-aaron-covid-vaccine-morehouse/>)

Aaron appeared at the Morehouse School of Medicine in Atlanta along with his wife Billye, where he received the first of what would have been two doses of Moderna's DNA-corrupting Wuhan coronavirus (COVID-19) vaccine.

Interestingly, California [halted its statewide Moderna vaccine injection program](https://www.naturalnews.com/2021-01-20-california-stops-moderna-coronavirus-vaccines-severe-reactions.html) after a “disturbing number” of serious adverse reactions were observed. Just days later, the Moderna vaccination drive [was quickly resumed](https://www.naturalnews.com/2021-01-20-california-stops-moderna-coronavirus-vaccines-severe-reactions.html). (<https://www.naturalnews.com/2021-01-20-california-stops-moderna-coronavirus-vaccines-severe-reactions.html>)  
(<https://www.foxla.com/video/892373>)

Civil rights leader Andrew Young and former U.S. Health and Human Services (HHS) secretary Louis Sullivan were both vaccinated with the Moderna jab alongside Aaron at the Morehouse facility.

Many black people across the nation are choosing to forego Wuhan coronavirus (COVID-19) vaccination because they keenly recall the Tuskegee experiment of the 1930s and other eugenics programs that have been utilized throughout history to try to exterminate “people of color.”

“The federal government essentially lied to Black people for decades – telling them they were getting free health care, when in fact they received horrifically improper care so the U.S. Public Health Service could secretly study the effects of syphilis when untreated,” revealed *TMZ* about the Tuskegee experiment.

Nothing has changed, of course, except for the fact that today's eugenics programs are aimed at pretty much *everyone*, light-skinned people included.

The AP conducted a survey back in December showing that upwards of 40 percent of black people will not be getting a China virus vaccine. Hopefully after seeing Aaron die and connecting the dots, many more will say no to the poison needles and embrace [natural remedies](https://www.naturalnews.com/2021-01-19-really-easy-to-treat-prevent-coronavirus-naturally.html) as a safe and effective alternative. (<https://www.naturalnews.com/2021-01-19-really-easy-to-treat-prevent-coronavirus-naturally.html>)

“Everybody line up like good little sheep and get your NOW (New World Order) Wuhan virus vaccine!” wrote one *NoQreport* commenter pointing out the absurdity of it all. “Everybody step right up and get an untested vaccine to combat a virus that kills .01% of people under 60!!! Don't be shy, step right up!”

Another pointed out that Aaron's death serves as more ammunition for Americans to reject any attempt at making Wuhan vaccines mandatory in order to buy, sell and travel.

To learn more about how Chinese virus jabs are injuring and killing people in droves, check out <http://Pandemic.news>.
