

Free Report: Here's What Dr. David Martin and Robert David Steele Have to Say on bioengineered weaponized pathogen called C o v i d

Robert David Steele and Dr. David Martin

<https://www.bitchute.com/video/XQN9pOwj5BOu/>

David Martin (DM): In 1999 Anthony Fauci realized the handwriting was on the wall. After spending just shy of \$1 billion he had an epic failure in the HIV campaign that had been going on since 1984 when he took over NIAID. He added influence. And in 1999 he hired a researcher at Chapel Hill University, Ralph Barrett to come up with a corona virus that could be amplified in its pathogenicity to target human lung tissue and human respiratory epithelium. ...this is precise and led to the patent on this.

DM: he (Fauci) wanted the corona virus to be more virulent its harm, but less replicable meaning *how can we get the target to hit, but not necessarily spread.*

Robert David Steele (RDS): is this what is called gain of function?

DM: it became gain of function; back then it was recombinant engineering. But back then gain of function as a construct is exactly that. Pick out an attribute, try to get it to express and then try to get it to move forward.

RDS: Dr. Judy Mikovitz on my show has said that NIH and CDC have targeted black people from day one and they have been using vaccines for depopulation of black people in the US just like Bill Gates has been sterilizing women around the world who have not had informed consent. Are you saying this was intended to target specific ethnic or blood types?

DM: I'm very precise in saying that they were targeting what can only be construed as a *targeting* in 1999 and they did not have a specific target but they did have a means by which you could get a pathogen. I'm very careful to say this is not corona virus. Remember, this is an engineered pathogen and we need to be

really clear on this because if we actually call it what it is, it is biological warfare and not some sort of public health.

DM: this is biological warfare. They specifically wanted to come up with something that would increase pathogenicity meaning that it would increase the illness someone had while not be hyper replicable which means that you would not transmit it easily. You and I both know...we had our share of time in the 80s and 90s and have seen our share of overt and covert action that has gone on. We both know what happens in the shadows. The fact of the matter is that I read this in 1999 and said, *'that feels like a weapon.'* It is only the fool who will not observe that we started manipulating this pathogenicity in 1999 and the first SARS outbreak was in 2003. We had gone for the whole of human evolution where corona virus was an annoyance; it was the sniffles, a cold, something else. Three years after we amplified its targeting of lung tissue we had the first SARS outbreak.

RDS: we also had AIDS which appears to have been a medical experiment.

DM: without question the issue here is a plausible argument that not only did we see this on the horizon and engineered and somewhere China and agents within the US—and I'm being really specific about this; listen to what I am saying—when you put your hand on the bible and raise your hand and take your oath of office it is not to protect the constitution from enemies foreign, it is foreign and domestic. This was a group of traitors in this country who decided to build a technology and they did it with foreign collaboration, specifically with China and specifically with individuals in Europe where they knew they were building a weaponized pathogen and they knew the weaponized pathogen that is bone chilling in its cruelty. I need to read this because if the public reads one thing out of this dossier, this is it:

This is a quote from February 12, 2016 and listen exactly to what was said by NIAID's lead marketing officer:

To sustain funding beyond basic crisis we need to increase public understanding for the need for medical countermeasures such as a pan-influenza or a pan-corona virus vaccine. A key driver is the media and the economics will follow the hype. We need to use that hype to our advantage to get to the real issues. Investors will respond if they see profit at the end of the process.

DM: listen to that! They are going to use the media to get the public aware.

RDS: in England they had a TV series in 2014 that laid out a fake pandemic.

DM: keep in mind the key is the media and the ‘economics’ will follow the hype. That was Peter Dashik. Eco Health Alliance, the money laundering arm of NIAID the organization that against the backdrop of the illegal gain of function research took that research to China. That guy on Feb 12, 2016 was published as having said *we need the media to hype this and the economics will follow the hype*. Why is that important? Because we have to understand that when you have economic co-conspirators, criminal coconspirators and now you have a very willful treason ... and I using that word by all its definitions...this is active harm to the US.

RDS: the treason is foreign collusion undermining the economy, the government, society and health of the US of A. there is no question that this would be found by a court to be treason.

DM: that’s exactly right and all of that is conveniently summarized in the 205 pages (of the David Martin Dossier). I want to point out, and you know how we have been surrounded by genuinely wonderful human beings who have decided to help advance the cause. Thankfully Bob Tyndall, an amazing guy out of Wisconsin decided that he was going to use his publishing company to make sure every senator in the US received a copy of this Dossier. That was for 2 reasons:

DM: The first reason is because in October, 2020, congress asked the General Accountability Office for the accounting of the billions of dollars that had been missing through the fingertips of NIAID and NIH. The report that was generated on Oct. 22, 2020, was a compendium of lies. That compendium of lies went to congress in which NIAID and NIH willfully lied to Congress in violation of section 1001 of the code: *willfully lied to congress*. They failed to disclose their financial interest in these colluding parties and businesses. You cannot do that and get a up-citizen (?) oversight.

RDS: there are 2 things: 1—congress is completely corrupt and compromised and congress has legalized lying to congress. The department of Defense for example

is now allowed to lie to congress. The dept of justice has told the Supreme court and other courts that it has authorized the lies in cases of 'national security.' The FBI has been castrated by Congress.... Lying has become institutionalized so I am curious to see how you see the future...

DM: so Bob Tyndall got a copy of the dossier into the hands of every senator in the US. We did this for a particular reason...so there is a public record.

RDS: that is a notice of public liability.

DM: exactly; we did not do it because we thought that somehow or other we would trigger some kind of moral uprising where there would be conscience that would be activated in the hearts and minds of the senators. We did it because we want to know that every single senator, every seated senator has the evidence that this has been not only an act of terrorism on the US, an act of treason by individuals within the US. But more than that we wanted to make sure that they were on notice that everything they do following is actively working against the entirety of the institution. We cannot have a conversation about the respect for the institution of Congress, the Senate, when they themselves have dishonored the institution.

RDS: I backed away from Co-vid because smarter guys than me, like you, are really on top of that. I have been focusing on Wall Street treasons, crime and satanic pedophilia. Dr. Cynthia McKinney is focusing on election fraud which enables a corrupt compromised congress....G. Robert Blakey who wrote the original RICO act is on record saying that Congress, the SEC, the FCC, FBI, the Dept. of Justice, and the US Attorney in the southern district of NY are all RICO organizations. This is huge. I want to ask you: there is a Nuremburg trial going on. There is a German attorney working in a very interesting way; what is your take on his success and mirroring your effort with the senators?

DM: Dr. Fulmig (?) and I have been in communication now for the last several months. I have a deep appreciation for the work he is doing and the fact that he is actually taking on what I think of as the foundation of this rather than the symptoms. One of my criticisms of the millions of dollars that have gone into court cases across this country is that they have been gnats on the back of the giant

camel of the problem. They are getting whacked away even when you get a decent judge in southern Illinois and you get a decent judge in central California . They do make rulings from time to time that seem coherent. But the vast majority of this is absolutely worthless and it creates the illusion that the incumbency can steam roller everyone.

DM: That is actually worse. What Fulmig is doing is important; he is going after the foundation and the assumption that gave rise to declarations of emergencies and all those sorts of things. That is really important and critical work. What has yet to happen and what I call for every single day and what I work on every single day is that we still need the criminal case. The criminal case is the reason why the dossier was put together. The reason why it was there is that I had 7 AGs across the country and several US attorneys who said they could not provision the investigation. In other words, they have to go to the DOJ and say they need a budget to do the investigation.

DM: if they cannot get the budget, they cannot allocate resources. As much as people think that law enforcement should just follow the crime, they have to go and get the investigations approved. They have to get subpoenas and search warrants and all this stuff and these AGs and US attorneys said *bring me the 'head of John the Baptist...the head of Anthony Fauci'*.

RDS: I just created a tiny URL: martin-dossier. That leads to your video and downloadable PDF.

DM: thank you for that; the issue is that what I needed to do is what the DOJ is refusing to fund. I sent my first OIG (office of inspector general) and my first DOJ inquiry in April of 2020 asking for a formal investigation. Under the statute they have a 90 day and a 180-day reporting requirement to actually respond to those things; none of those things happened.

DM: when I reached out to the attorneys and AGs across the states I found that none of them had budgets and I'm being polite...they also had not competency, but they had no budgets to go after this investigation.

RDS: one of the things I am doing is supporting the constitutional sheriffs association, CSPOA.org and there is also a constitutional lawyers association. I am trying to create a constitutional pastors association, a constitutional doctors' association and an initiative to make every county self sufficient with cyber coins, with dark fiber and with non-harmful mesh Bluetooth that goes 500 meters. I see the day coming when we end federal and state income taxes. We do automated payment transaction tax and fund this from the bottom up and anybody who commits treason in a county can be killed and the body burned and we don't need the DOJ's corrupt permission.

DM: what I think is important is that we have been surrounded. Just today the MSM has been handing out this lukewarm oatmeal narrative that Anthony Fauci and Bill Gates are the most misunderstood, benevolent folks on the planet. It's amazing what happens when you recite the same mantra over and over again. There is an enormous number of people who get hypnotized into saying that there must be something good. It turns out that Anthony Fauci has actually committed crimes and it's important that as we saw back in Enron, when we didn't have the reform of the securities laws until we had the perp law.

RDS: Bill Binney and I have been saying on the record that we have it all; we have every email, every text, every game chat where people were trying to hide stuff, we have every banking transaction including all of the off-shore banks and we also have every corporate supply chain transaction. The problem is that NSA has not processed all this.

DM: we have CDRs—call data records—from everybody we need it.

RDS: we truly have it all; what I am anticipating... the Trump Hotel room rates are now \$3,000 for a \$675 room for the week of March 1 through 7. I consider that an indicator that President Trump is coming back; we will see. The bottom line is that I know that Admiral Rogers weaponized the NSA against the deep state in the same way the deep state weaponized CIA and FBI against President Trump. I am convinced in my heart that we are going to see some NSA level disclosures. I will tell you what these people fear. They do not fear fines. They don't fear jail because Eric Holder took jail off the table. What they fear is public disclosure of their crimes; they will be torn limb from limb by vigilante mobs. Under truth and

reconciliation I want to emphasize I want them to make the deal and go into witness protection. Make the deal or die at the hands of the public.

DM: I think it is critical to realize and my view is simple, I love to be the humanity I would like to see manifest. That includes responsibility. One of the reasons at almost 54 years of age I feel very confident in having the clarity of my voice resounding across every platform is because I don't have to remember what I said. I don't have to remember who I said it too.

RDS: when I was at CIA they created the Artificial Intelligence staff around me in 1986. One of my first tasks was to think about how the office of legislative affairs could keep track of all the lies that it had told. Congress...when you tell the truth you don't have to keep track. When you tell lies, you do have to. This was CIA in 1986.

DM: it's beautiful that you and I know that we can have a conversation and we don't have to do *did we say the wrong thing?* The problem that we have is the evidence and the lies are in the same plain sight and we just don't know where to look. We have been talking about nano particles.

DM: we did a report many years ago on self-assembling nano particles for the various intelligence agencies around the country. There have been global technology assessments that are reports which are the phone books of bad actors. It can be super-cavitation, hypersonic munitions, EMF and EMP disrupting technologies. You name it and we put those together. It is critical for our intelligence and for our trade and commerce and our national resilience strategy to know the state of the art. When it comes to nano particles, we have been reporting on these for the last 15 years.

RDS: I was doing smart dust and other things....

DM: the issue is, and this is really important and the public really needs to understand this, if you go into the descriptions which are the meat of the patent applications, you can actually map where the human mind has hypothecated a thing to go...people imagine where they might be able to take a thing in their imagination. We map that imagination and we use that to profile. I have posted

some of them online on davidmartin.world and on the youtube channel davidmartin.world. We are posting a lot of that material.

DM: we should figure out a way to disseminate some of these.

RDS: do you have a bitchute channel? You need to have one. Anyone who publishes in youtube is destined to have an 'empty gray box' or a broken link. Anything we are interested in will inevitably be censored. Once you create a bitchute channel which should be your name, the CEO is a friend of mine and he will back up all your youtube with no additional work by you. When you load a youtube he will automatically put that in your channel.

DM: you know how important this is. These are issues like the Nuremburg trial. The persistence of memory and evidence is so necessary. We have to be able to look and we have to know that people of conscience and integrity stood against the tide of darkness. We have to have that message....I agree with what you are doing to make this information available.

DM: as far as the nano particle situation I think that we are missing something very important. This is an issue that I am going to do more work on. Back in 1994, 95 and 96 the Dept of Defense started to having a large black allocation going into EMF and EMP.

RDS: we have never been serious about EMF ...

DM: we poured an enormous amount of money into the illusion of hardening communications infrastructure and my concern is that we actually have a susceptibility now at the human level to be engineering kill switches.

RDS: Tom Beard and I go back many years on scalar warfare, gravito-biology and bioacoustics. There is serious stuff about the relationship between biology and electro magnetics. What is your prescription or prognosis for cleaning all of this up?

DM: it's really critical that people examine their own physical infrastructure. I am doing a lot of analog archival that an EMP burst will not take out. I am hardening

things, I am storing things and things that are outside the susceptibility of a burst or a blast. I am doing the same thing with my own body and I am being specific about this. I don't take in something that is not an organic substance and I am not interested in any intervention that is anything other than what I know is non-intermediated with the infection of particles and nano particles. It's not absolute, but it's decreasing the frequency.

DM: we are being exposed to aerosolized environmental...a ton of stuff that is probably still getting in our bodies.

RDS: if I were doing it over I would have a whole house water filter. The shower is killing your body.

DM: lessen your susceptibility. I don't subscribe to any notion to living on a mountain top in a copper shield. What I know that we can consciously diminish how much energy, time and space we allocate. It's about decreasing our reliance on the introduction of interventions. These come in the form of tests, they come in the form of therapy, all sorts of brands and you need to be aware that if it gets injected into you, put on your surface and if anything happens where you are in contact with the thing that is being delivered to you, step away to you.

DM: my website is davidmartin.world and it's davidmartin.world on youtube.

RDS: can the human spirit expel nano particles? Some people are telling me that the earlier particles were treated by the body as invasions that were expelled.

DM: my positive note to end on is that as long as you and I have conversations I have nothing but optimism. What was most frequently done was agencies of darkness making sure that people felt there is no hope, light or future. What you and I are doing is standing against that tide and I love that. For me it is absolutely simple. We can go back to every tradition. It doesn't matter what religion or faith you are. What you realize is that by instituting and internalizing fear and responding to fear responses you are engaging the slow motion suicide. You are killing yourself.

RDS: so we end on a note of hope;

DM: you are the organization of the most perfect matter and energy ever assembled and no intervention whether it is fear, terror, chemistry, magnetism, electronics, nothing can defile what was formed as sacred.
